## Step-by-step guide

You can sign up to InboxSys on <https://app.inboxsys.com/login.php?showform=createaccount>. (People with a referral code can use [this link instead](#)) Before the first login, your E-Mail address needs to be verified. We will send an Email with:

1. Username
2. Password
3. Activation code

In this E-mail, an activation link can be found. This link has the activation code included. Signing up should be as simple as pressing the link in the E-mail and entering username and password. If, for any reason, the activation code is not included in the link, you will be asked to enter the activation code manually.

## What if it does not work?

In case the first E-mail does not arrive - please allow it 30 minutes and check all mail-folders and tabs before to proceed - a new password can be requested at <https://app.inboxsys.com/login.php?getpassword=yes>. With username and the new password, a fresh activation code can be requested after login.

## How long can I use InboxSys?

InboxSys can be tested in full functionality for 14 days. After those 14 days, a commercial licence can be acquired from within your account. Detailed information on features and pricing can be found at <https://inboxsys.com/>
